

## We are looking for a Chief Technology Officer

OctopusBI is an Australian based Education Data Analytics company, consisting of a passionate group of talented professionals who are working in our local office situated in Colombo, Sri Lanka. Currently, we are looking for a **“Chief Technology Officer”** to join our team in Sri Lanka.

Octopus BI is on a mission to transform the education industry using data analytics. We are looking for a technology leader to work closely with the leadership team to develop a technology strategy and build our product ecosystem.

If you are up for the challenge, please send us your CV.

### Responsibilities;

- Formulate a vision for how technology will be utilized within Octopus BI
- Outline company goals and timelines for research and development
- Develop technical aspects of the company’s strategy for alignment with its business goals
- Ensure that the technological resources satisfy the company’s short and long-term needs
- Verify all technological practices adhere to regulatory standards and compliance
- Identify and implement innovative technologies that yield a competitive advantage
- Manage large teams, big data, and the product life-cycle
- Help departments use technology profitably and act as a mentor to team members
- Supervise system infrastructure to ensure functionality and efficiency
- Build quality assurance and data protection processes
- Monitor KPIs and IT budgets to assess technological performance
- Capitalize on stakeholders’ feedback to advise on necessary improvements and adjustments
- Communicate tech-strategy to partners and investors
- Make executive decisions on behalf of the company’s technological requirements

### Requirements;

- 5 years+ in a technology leadership role
- Agile mindset
- Experience working with SaaS platforms, ideally for a cloud-based product company
- Previous startup experience building out tech stack from scratch (Keywords: AWS, SaaS, Scale, DevOps, QA, Security, Performance, Kubernetes, Serverless, Big data)
- The energy to work in a small, nimble and fast-paced environment
- Hands-on with solution implementation (Not to write code but the ability to review, know what exceptional looks like and roll sleeves up to help solve complex problems)
- Experience in complex third-party integrations
- A systems mindset with the vision to implement automation wherever possible

An attractive salary package awaits the right candidate
