OCTOPUS

We are looking for a
Business Analyst/ Scrum Master

We are an Australian based Education Data Analytics company, with a team of passionate talented professionals, working from our local development centre located in Colombo, Sri Lanka. Currently, we are looking for an experienced Scrum Master to join our team in Sri Lanka.

The ideal candidate should be highly results driven, proactive, well organized, have exceptional communication skills, and a passion for 'agile' and execution with excellence.
You need to bring a 'Get the Job Done' attitude while providing leadership to your team.

If you are up for the challenge, please send us your CV.

Responsibilities

- Understand the requirements passed down from the Product Owner and ensure that the requirements are provided to the expected quality and clarity.

- Drive your team to understand the requirements and identify factors which affect sprint delivery, such as estimation of work, dependencies among tasks, risks, etc…

- Identify dependencies among cross-functional teams and planning for the sprint delivery.

- Monitor progress within the sprint and identify possible challenges (impediments) proactively whilst taking measures to overcome them.

- Provide strong leadership and motivation to your high performing team.

- Do continuous follow-up with the team to understand any risks on delivery timelines and act proactively to overcome them.

- Ensure ontime JIRA ticket updates (status, progress, risks, etc…)

- Facilitate delivery practices such as daily stand-up meetings, product demos, sprint retrospective meetings.

- Manage optimal resource allocations and workloads throughout the development process.

Requirement

- Strong leadership skills and ability to provide it under pressure.

- Ability to learn the product features/ functions thoroughly.

- Analytical thinking skills with ability to make situational decisions under challenging circumstances.

- Excellent project management skills and overall knowledge of Agile methodologies and principles.

- Good understanding of the SDLC.

- Minimum 3+ years of experience or equivalent in roles such as Scrum Master/ Project Manager/ Business Analyst.

- Prior experience in managing medium to large scale teams would be an added advantage.

- Learning attitude/ motivated learner.

- Ability to think out of the box and introduce/ propose new practices/ improvements when necessary.
